ABOUT THE COMPANY

R.K Minerals is a leading miner, supplier & exporter of Industrial Minerals like Feldspar, China clay (Kaolin), Talc (Soapstone), Quartz, Bentonite, etc. We have been importing & exporting high-quality minerals, which serve as vital inputs for several industries, including ceramics, cement, glass, glazes, paints & cosmetics, etc.

OUR BUSINESS

Knowing exactly what material our client

1

Getting the result of the sample

3

Accepting & Preparing the material

5

Dispatching the material

7

2

Sending sample for the purpose of testing.

4

Sending Quotation with competitive prices

6

Quality inspection

8

After sale support in case of need

RK MINERALS INDIA

OUR PRODUCTS

CHINA CLAY

We supply various grades of china clay which are used in various industries for their specific needs. Our clay is mined, processed and supplied with latest machinery and experts in the field of mining

BALL CLAY

We have different grades of Ball clay for their specified use. It is mainly used in the manufacture of ceramic whiteware and are valued for their key properties of plasticity, unfired strength, and light fired colour.

LEVIGATED CLAY

It is produced by levigation process. We manufacture different types of washed china clay (kaolin) grades which are available in powder and lump form.

RK MINERALS INDIA

OUR PRODUCTS

TALC

(Crude, Powder)

Our talc is mainly used in ceramic industries. Rajasthan being talc rich state has highest deposit of talc in India. Our talc has low levels of calcium and iron.

SODIUM FELDSPAR

(Crude, Powder, Grains)

The Na₂O% of our material ranges from 5-10 %. we have set up VSI plant for grinding the crude into powder form of various mesh sizes

POTASSIUM FELDSPAR

(Crude, Powder, Grains)

The K₂O% of our material ranges from 5-11%. Rajasthan being feldspar rich state gives us advantage of supplying high quality material with competitive prices

RK MINERALS INDIA

OUR PRODUCTS

QUARTZ

(Crude, Powder, Grains)

Quartz mainly comprises of silica which serve as a vital input for various industries like glass, ceramics etc. we have three different grades of quartz as per their whiteness

CALCINED KAOLIN

Calcined Kaolin is a product developed after calcination of high purity of kaolin clay at medium to high temperatures depending on end applications for its customers
Calcined Kaolin's has the most widely used in various applications worldwide.

MICA

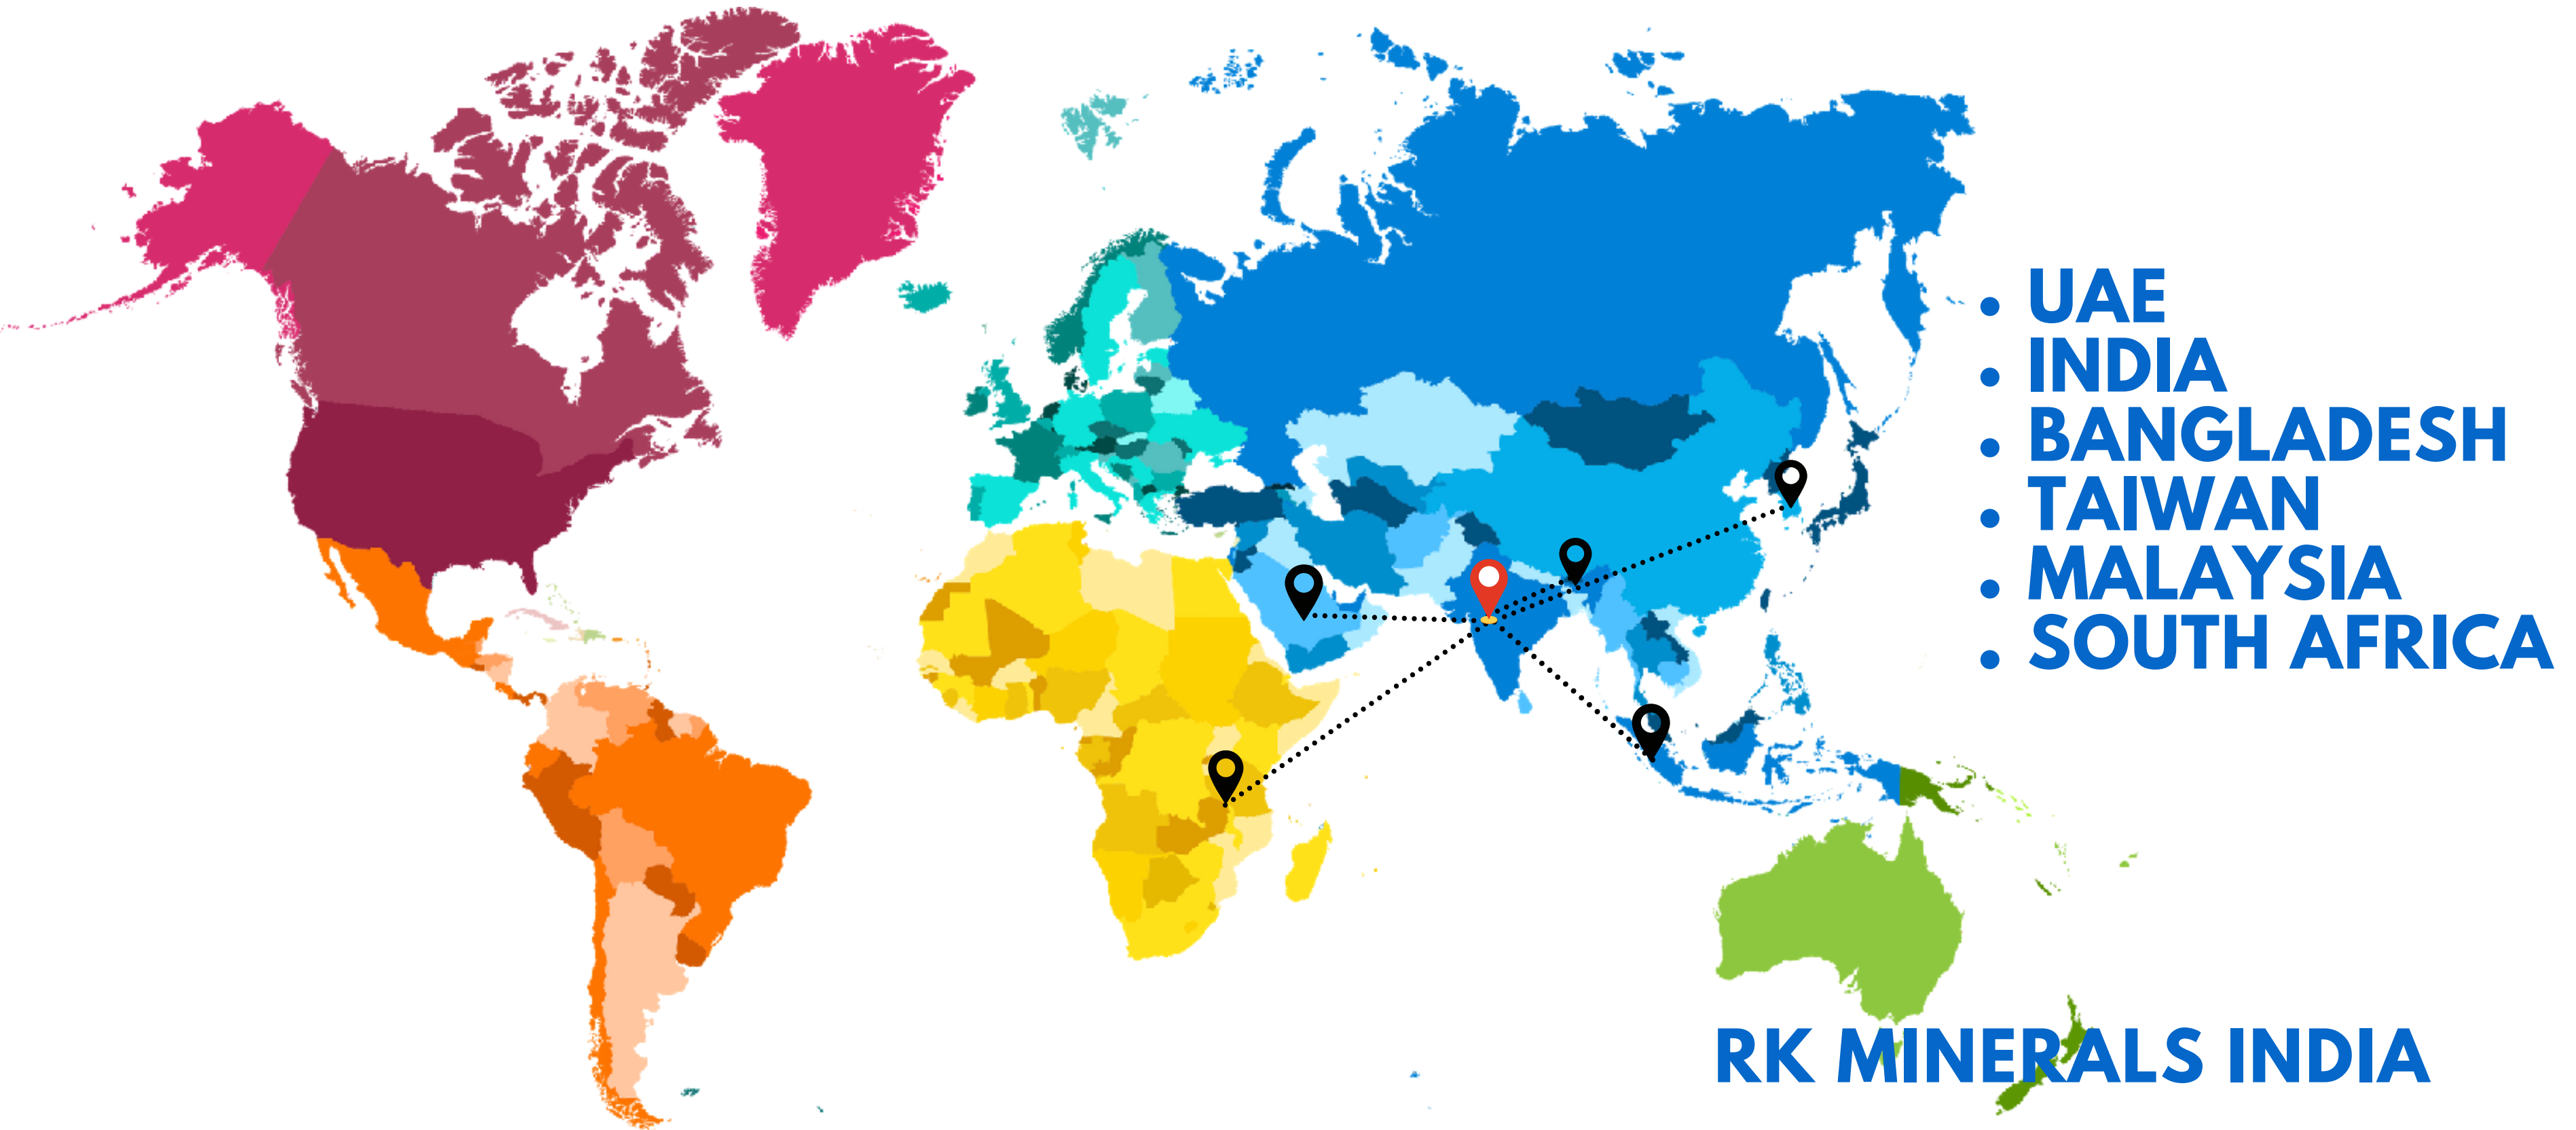

Mica is comprised of different ratios of potassium, aluminium, iron, water and magnesium. It retains elasticity and toughness even at high temperature. We have mica flakes and well as mica powder in various grades like course, medium, fine and superfine
